\_pool + spa

welcome

## swimming pool

Few things can match the wonderful feeling of wellbeing when floating lazily in warm, sun-dappled water; or being pampered and massaged with fragrant oils at a luxury spa; or when you plunge into a cool refreshing pool... Indoors or outside, small or large, a swimming pool enriches a living space, providing a peaceful oasis, somewhere to relax, entertain or exercise.

Cocktail Blue Lagoon

## Be bold ...

You'll be amazed at how the colours of glass mosaics can change when placed underwater and with different lighting effects. We've added yet more colours, textures and finishes to our extensive range of mosaics, to ensure your pool is unique and beautiful

# pool mosaics

## All things are possible

Thinking of a colour other than blue? Not a problem. Want a motif at the bottom of your pool? You can choose from a number of off the shelf options, or you can have a bespoke pattern in the pool or beautiful design on the wall of your spa

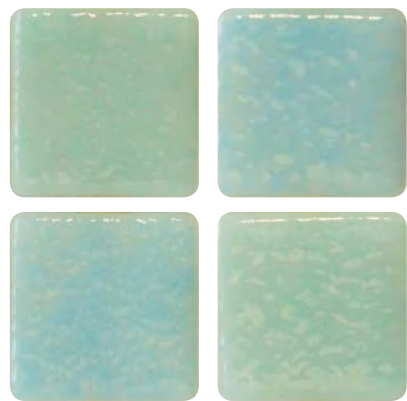

Like textured mosaics? Metallic effects? Prefer creating your own mix of colours? All these are possible, just talk to us about your ideas

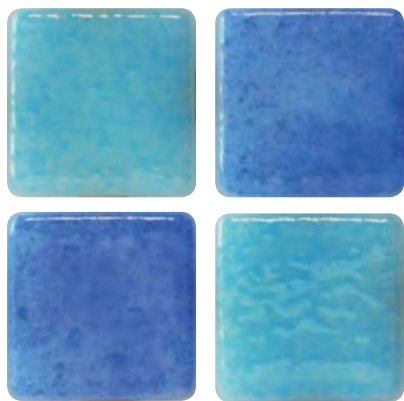

# Glass Mosaics

## Niebla 25mm, 36mm, 50mm

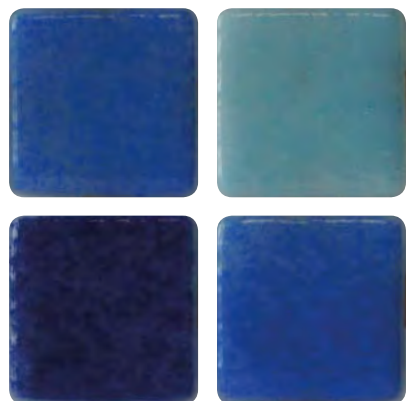

Mosaics featured on the following pages use JointPoint® – an innovative system of flexible silicone joints that hold the individual mosaics together in sheets. JointPoint® offers a number of advantages over traditional mosaic sheet manufacture. Turn to page 39 for further details.

Special mix of Iris Coral and Jade Antislip

## Antislip Mosaics

Step edges, wet room or steam room floors can now be both stylish and safe with these slip resistant mosaics. A wide range of colours means they can be used to co-ordinate or contrast with other shades

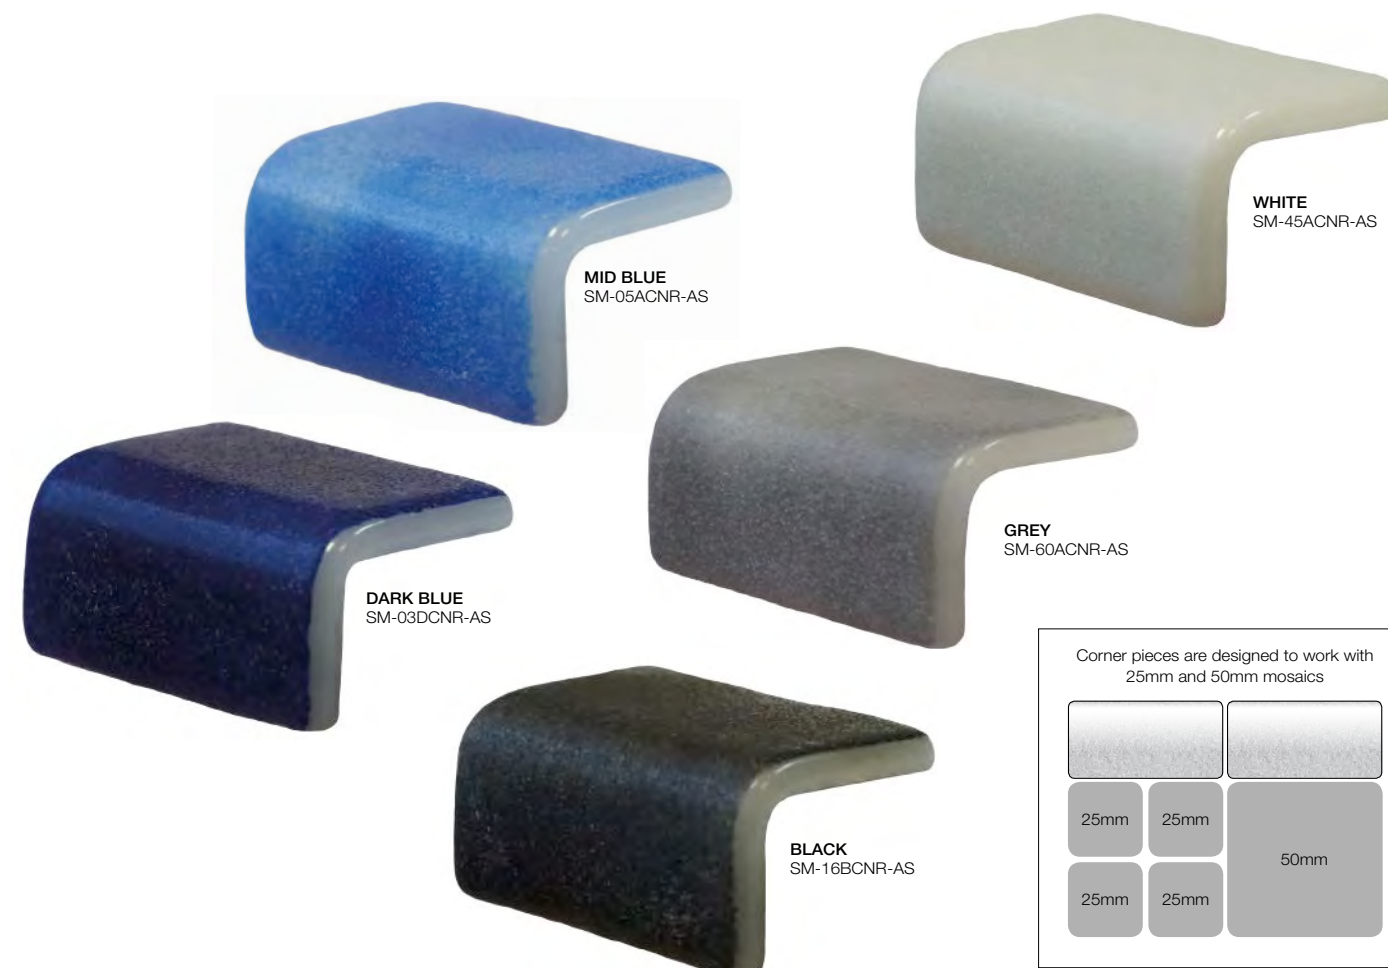

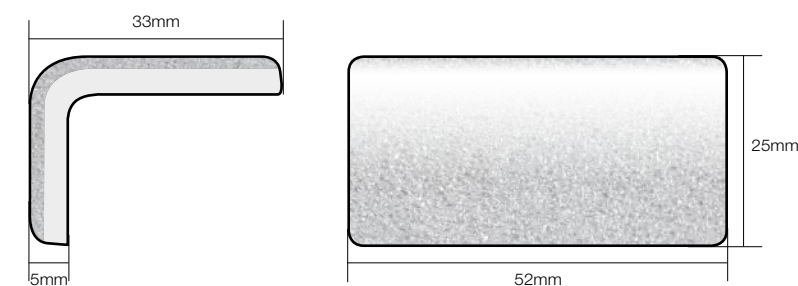

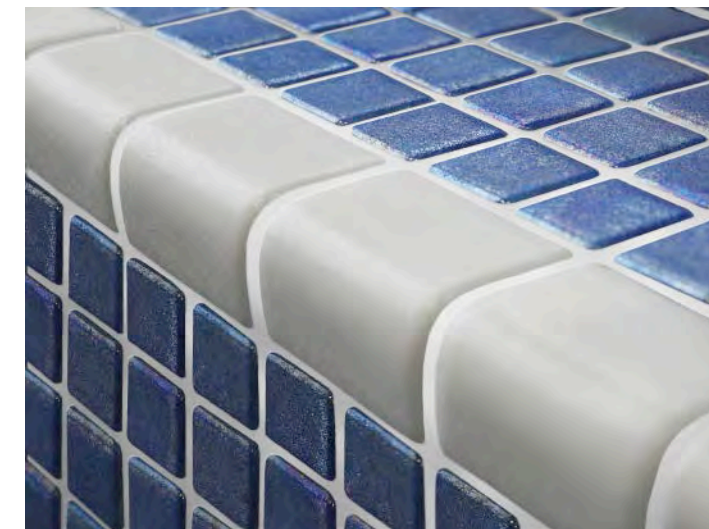

Detail of Iris Cuarzo Antislip surface

## Niebla Antislip Roll Edge Corners

With the same slip resistant textured surface as the mosaics, these new, innovative corner pieces provide a seamless and safe edging for the transition from pool side to pool and for step areas

At 52mm in length, the pieces are also small enough to be used effectively to create curves. Sharp edges are completely eliminated with these corner pieces.

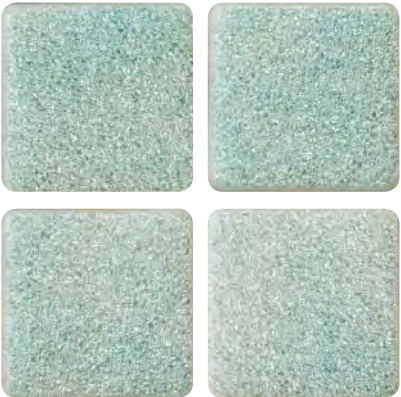

- Available in five Niebla colours – White, Grey, Mid Blue, Dark Blue and Black
- Use as a contrasting edge or to coordinate with any of the existing Joint Point ranges
- Textured slip resistant surface for safety
- For pool edges both straight and curved, step edges
- Attractive finishing piece
- Easy to install at the same time as the tiling

# The JointPoint® System

JointPoint® is a technologically advanced system where silicone points are used to join individual mosaics together into panels (the points are on the reverse of the panel or sheet). Designed to ensure that the sheets are laid uniformly, up to 92% of the surface is left free for the application of adhesive, which results in better adhesion and superior grip. JointPoint® is very easy to work with and install – the sheets are flexible and controllable.

**WATER IMMERSION TENSILE ADHESION STRENGTH**  
Each family type of mesh/glue backing system for mosaic tiles, recommended for water submerged conditions (not salt water), are tested in accordance with BSEN 1348:2007 Determination of Tensile Adhesive Strength for Cementitious Adhesives.

The tests are conducted by a UKAS accredited testing laboratory, number 0013. The mean value of water immersion tensile adhesion strength is determined for each family type of mesh/glue backing system after allowing for any discarded samples.

EN 12004:2007 + A1:2012 states that the tensile values for a C2 adhesive must be greater than or equal to 1.0 N/mm2. Each family type of mesh/glue

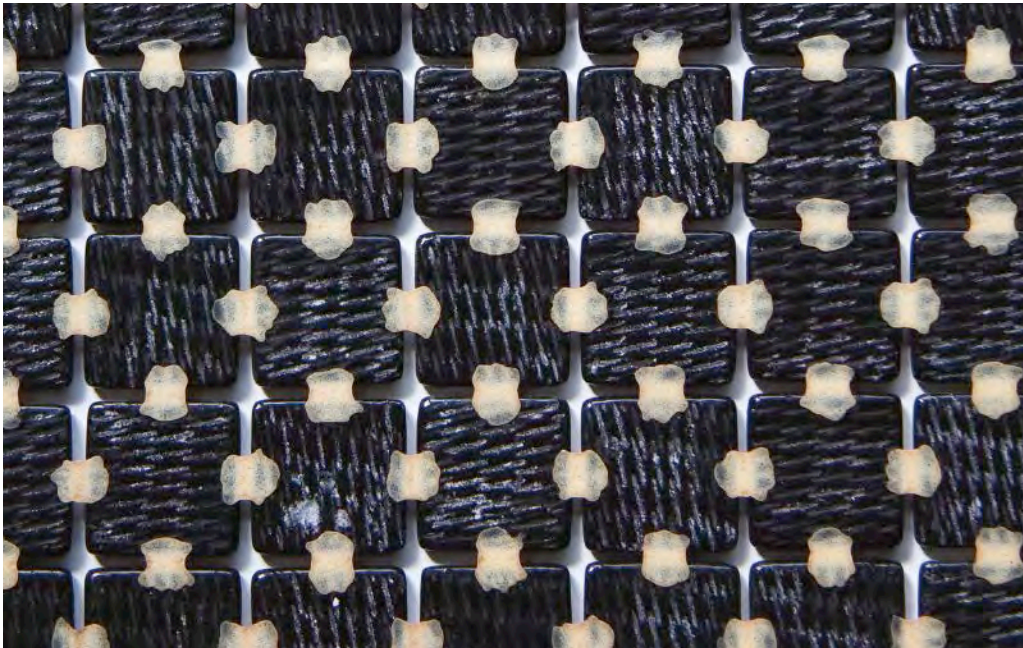

backing system meets this requirement. For example, the JointPoint® family type of mesh/glue backing system yielded a result of 1.3 N/mm2.

It must be noted that each family mesh/ glue backing system for mosaics is tested using Ardex x77 C2 adhesive. All test materials, including the adhesive being tested, were conditioned as required by the test method BSEN 1348:2007.

The Ardex x77 adhesive was prepared in accordance with clause 7.0 of the EN 1348 standard.

Ardex x77 C2 adhesive is the recommended product for use with all JointPoint® Designworks/Original Style swimming pool mosaic tiles installed in submerged conditions. For salt water swimming pools we recommend the use of an epoxy adhesive only.

All mosaics shown on pages 12-34	
Individual tile size	Sheet size

**FANTASY** | GW-FANMOS  
320 x 320 x 6mm

\* Film faced and paper faced mosaics should be adhered using the same method as for mesh-backed mosaics, but with the film facing outwards. Leave for 24 hours before peeling off the film. Please contact us for full fixing instructions.

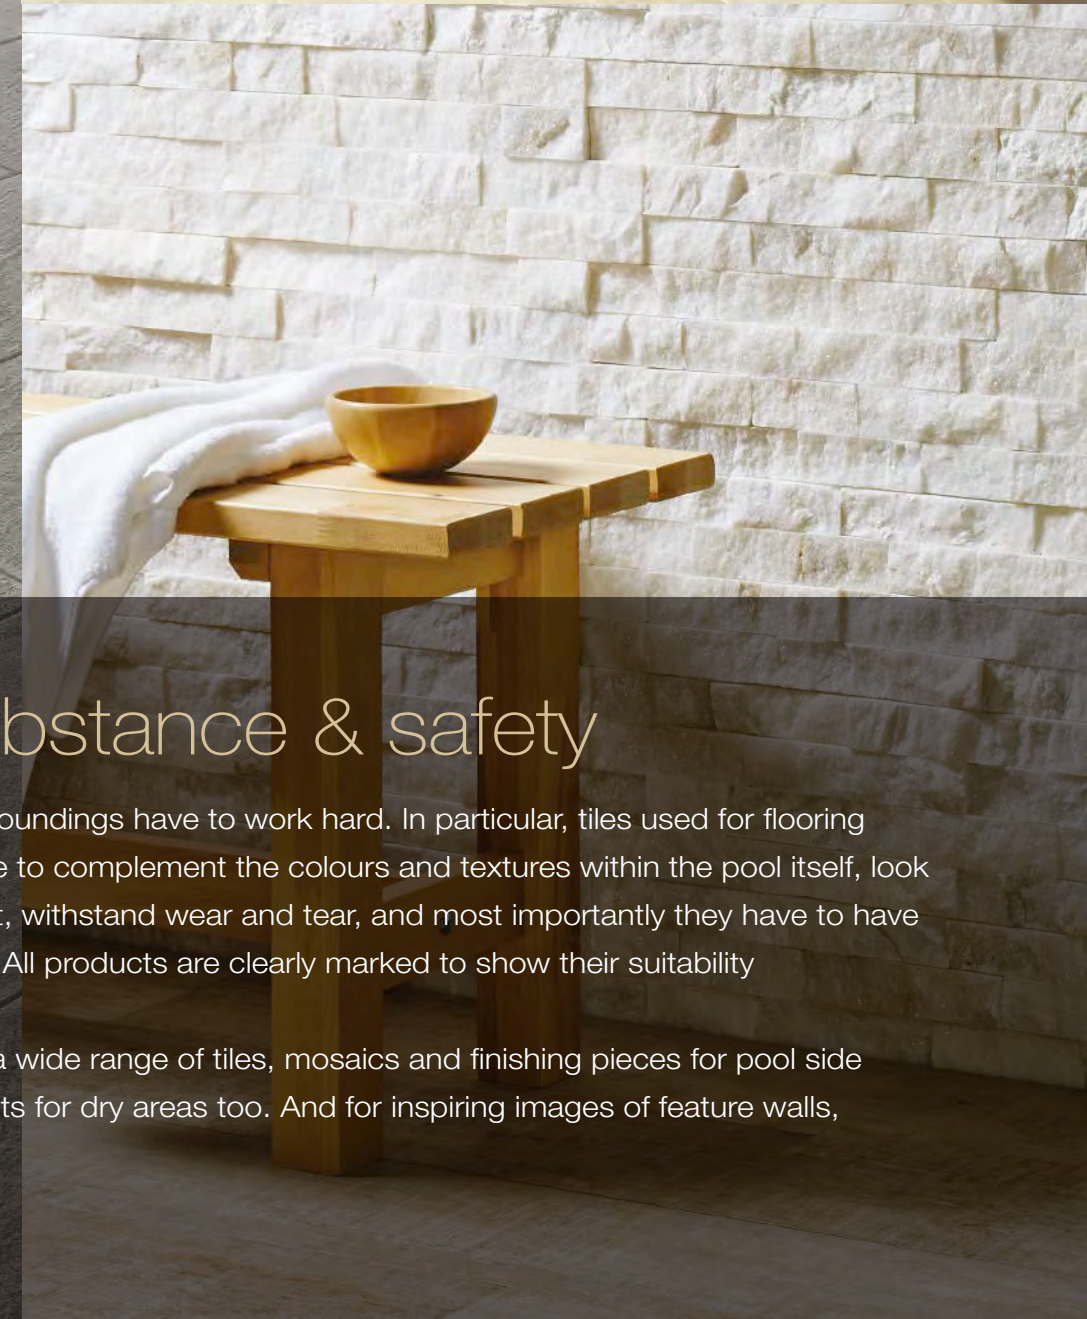

# pool side & spa

## Style, substance & safety

The pool and spa surroundings have to work hard. In particular, tiles used for flooring around wet areas have to complement the colours and textures within the pool itself, look good in their own right, withstand wear and tear, and most importantly they have to have slip resistant qualities. All products are clearly marked to show their suitability

This section includes a wide range of tiles, mosaics and finishing pieces for pool side surrounds and products for dry areas too. And for inspiring images of feature walls, turn to page 79

# bricks

These brick slips feel and look exactly like traditional bricks, and can be used on both walls and floors

**ANTICO CASALE ROSATO**  
**CS1146-2506** 250 x 60 x 10mm per piece  
Barefoot Wet (TRRL55 Wet) = 51

**ANTICO CASALE MATTONE**  
**CS1145-2506** 250 x 60 x 10mm per piece  
Barefoot Wet (TRRL55 Wet) = 51

**ANTICO CASALE FUMO**  
**CS1147-2506** 250 x 60 x 10mm per piece  
Barefoot Wet (TRRL55 Wet) = 51

**MATTONCINO BIANCO**  
**CS1148-2506** 250 x 60 x 10mm per piece  
Barefoot Wet (TRRL55 Wet) = 51

**MATTONCINO NERO**  
**CS1149-2506** 250 x 60 x 10mm per piece  
Barefoot Wet (TRRL55 Wet) = 51

The products on this page are all available from stock.

Please note: brick tiles are individual pieces. Tiles are shown here in repeat to demonstrate the colour and detail variations which make these brick effect tiles so convincing.

For a completely authentic look we recommend a 10mm grout gap as shown.

**CB05-010-1515** 150 x 150 x 10mm  
Shod Dry (4S96 Dry) = 56 / R9

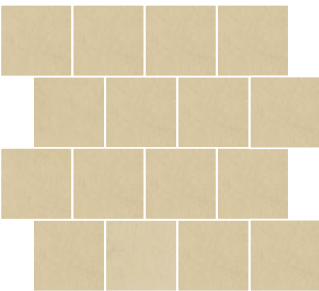

Achieve a seamless transition from inside to out.  
This range of non-rectified tiles and mosaic offers a wide choice of options. 'Inside' is for walls and internal dry floors, with its softly riven finish. 'Outside's' more pronounced riven texture and low slip potential makes it perfect for pool surrounds, wet areas and outdoors

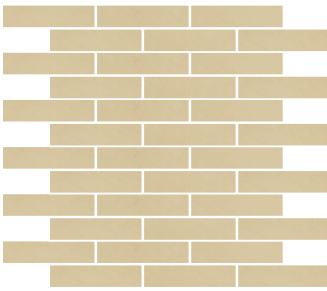

**OUTSIDE (SLIP RESISTANT) WHITE MOSAIC**  
**CB05-011-MOS** 300 x 300 x 10mm  
Barefoot Wet (TRRL55 Wet) = 50 / R11C

## pool bricks

Form and function. The classic 'swimming pool tile' - ideal for community spaces. Includes moulding pieces that can be used as pool edges/grips or skirtings

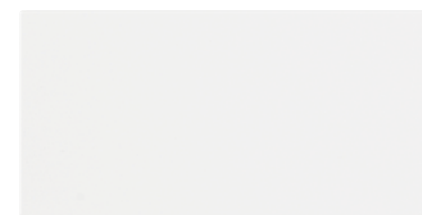

**COBALT FLAT GRIP**  
CS1187-2512  
245 x 120 x 6mm  
Partially glazed and rounded at the edge. Ideal for step or pool edging.

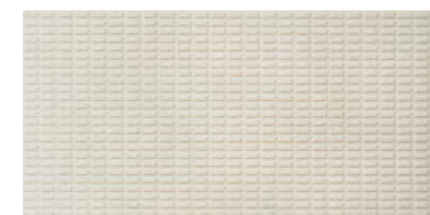

**COBALT CONTOURED GRIP**  
CS817-2513  
245 x 120 x 20mm  
The deep unglazed channel and large glazed edge ensure comfortable and effective grip.

Alternative use as skirting

**WHITE SLIP RESISTANT** | CS813-2512-AS  
245 x 120 x 6mm

**STRUCTURED UNGLAZED** | CS818-2512  
245 x 120 x 6mm

**WHITE GLOSS** | CS813-2512  
250 x 125 x 6mm

**COBALT BLUE GLOSS** | CS815-2512  
250 x 125 x 6mm

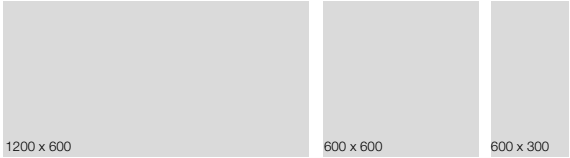

**LIGHT BLUE GLOSS** | CS814-2512  
250 x 125 x 6mm

Floor: Light Grey Structured 6030, Wall: Dark Grey Natural

# absolute

Mix and match with a palette of muted shades from light to dark, with a structured slip resistant option suitable for wet floor areas

**BROWN MATT**  
**CB05-037-10016** 1000 x 165 x 10.5mm  
Shod Dry (4S96 Dry) = 37 / R10B

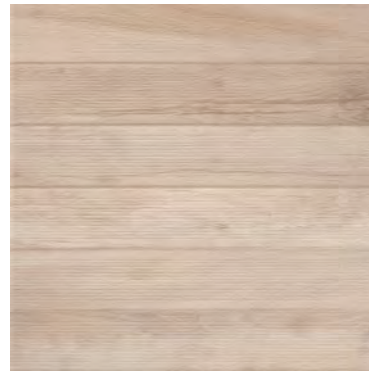

# deck

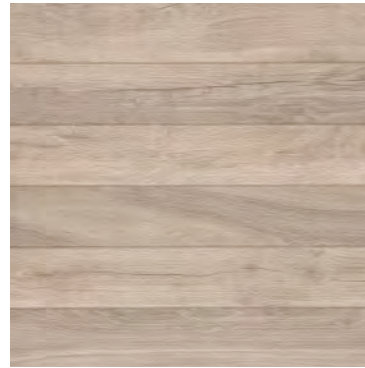

Slip resistant decking tiles

**DECK PEROBA**  
**CS971-6060** 600 x 600 x 10mm  
 Barefoot Wet (TRRL Wet) = 79

**DECK TECA SUAVE**  
**CS969-6060** 600 x 600 x 10mm  
 Barefoot Wet (TRRL Wet) = 79

**DECK TECA INTENSA**  
**CS970-6060** 600 x 600 x 10mm  
 Barefoot Wet (TRRL Wet) = 79

Peroba

# arbo

Richly coloured  
 wood-effect planks

**CARVALO TEXTURED SLIP RESISTANT**  
**CS1052-12020** 1169 x 190 x 11mm  
 Barefoot Wet (TRRL55 Wet) = 45

**CARVALO NATURAL**  
**CS1051-12020** 1169 x 190 x 11mm

Due to the variety of sizes available in this brochure, please note that products are not always shown at the same scale as others. Please use the stated dimensions for an accurate guide to sizes

Floor: Carvalo Slip Resistant ►  
 Wall: Carvalo Natural & Carvalo Décor (see p81)

# feature walls

Add drama with a feature wall. Choose from large format tiles that look like stone, smooth pebbles, industrial style metallic effects, or the warm tones of wood effect planking

Ashtree Clapboard

# canela and ash tree

Realistic wooden clapboard-effect tiles in two colours, each with a coordinating wood-effect plank option

**ASH TREE CLAPBOARD TEXTURED MATT**  
CS1142-9030 900 x 300 x 12mm

**ASH TREE MATT**  
CS1141-12020 1200 x 200 x 11mm

**CANELA CLAPBOARD TEXTURED MATT**  
CS1140-9030 900 x 300 x 12mm

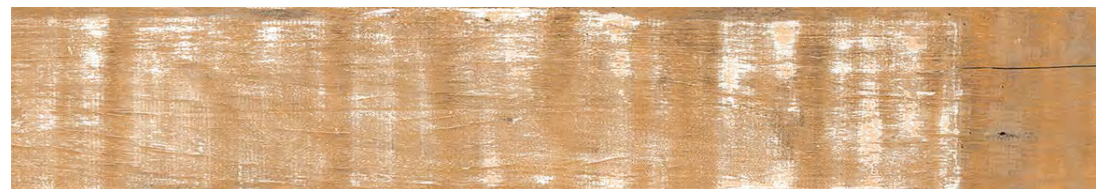

**CANELA MATT**  
CS1139-12020 1200 x 200 x 11mm

Due to the variety of sizes available in this brochure, please note that products are not always shown at the same scale as others. Please use the stated dimensions for an accurate guide to sizes

# Painted

Wood-effect planks with a clever reclaimed, stripped-paint style

**BEIGE**  
CS1049-12020 1169 x 190 x 11mm

**GREY**  
CS1050-12020 1169 x 190 x 11mm

Arbo Carvalho Décor

Painted

# arbo carvalho

**CARVALHO DÉCOR**  
CS1053-12020 1169 x 190 x 11mm

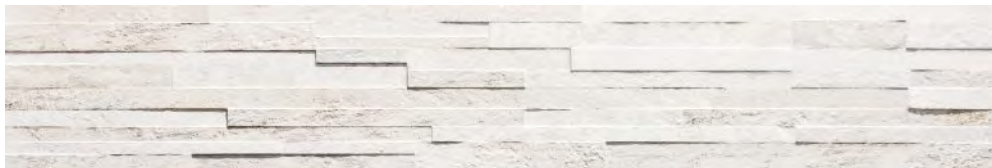

# sisal

Porcelain wall tiles with all the detail and texture of woven sisal

**Sisal Glazed Porcelain**  
CS787-9015 • 900 x 150 x 10mm

**ATENAS**  
CS1044-9015 900 x 150 x 10mm

# atenas

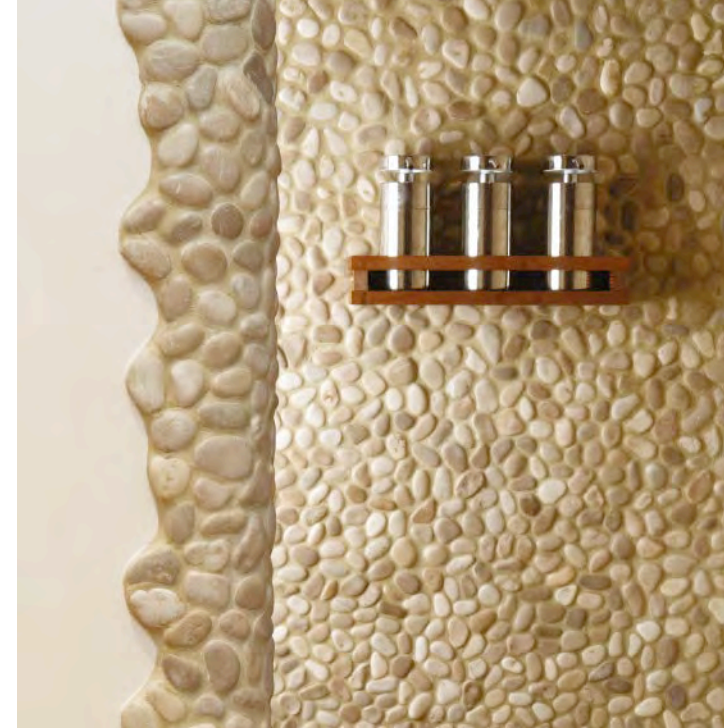

The appearance of split-face stone recreated on tiles

Due to the variety of sizes available in this brochure, please note that products are not always shown at the same scale as others. Please use the stated dimensions for an accurate guide to sizes

# stone pebbles

Softly rounded natural stones with no hard edges

Beige Hawaii

**IVORY SAMOA BORDER** | EW-SAMOAB2  
250 x 100 x 10 -14mm

White

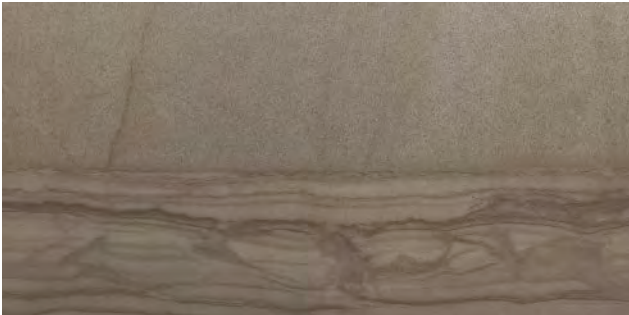

**WHITE**  
**CS1061-9015** 900 x 145 x 10mm  
**CS1061-9022** 900 x 220 x 10mm  
**CS1061-9045** 900 x 450 x 10mm

**GREY**  
**CS1062-9015** 900 x 145 x 10mm  
**CS1062-9022** 900 x 220 x 10mm  
**CS1062-9045** 900 x 450 x 10mm

# amelia

Stunning large format tiles with varied and subtle stone effect details

**CARBON**  
**CS1063-9015** 900 x 145 x 10mm  
**CS1063-9022** 900 x 220 x 10mm  
**CS1063-9045** 900 x 450 x 10mm

In this range:

- 900 x 145
- 900 x 220
- 900 x 450

Please note: these tiles replicate the natural variations of stone, therefore tiles will vary in appearance from those shown

White Lappato

# oxide

Lappato - a semi-polished finish on these aged effect plank tiles

**WHITE LAPPATO**  
**CS1120-12020** 1200 x 200 x 11mm

**BLACK LAPPATO**  
**CS1121-12020** 1200 x 200 x 11mm

Please note: the ageing effect on these tiles is random and varies in intensity as illustrated in the room set shown. Individual tiles may differ from the swatches shown above.

Cimento

# studio

Co-ordinating plain and textured waves, all with a matt finish

BEIGE LIMESTONE PLAIN MATT

\*\*\* All stone mosaics must be sealed prior to installation.  
The products on this page are all available from stock.

## fit & finish

Some elements should not be ignored, even with the grandest design.  
The right fixtures and fittings can make a project perfect.  
It's all in the detail

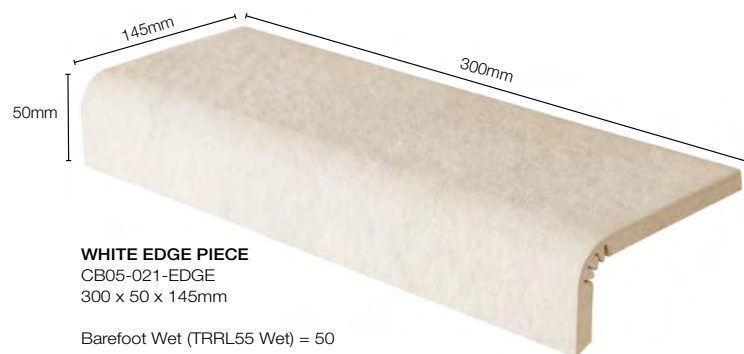

Dorset Pool Grip in White, Luna White, Dorset Step Tread in Black with Niebla SM-2562MOS

## get a grip

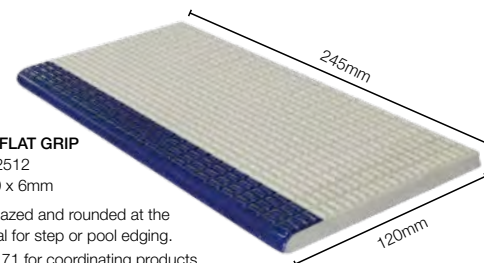

Porcelain pool grips and edging pieces for the perfect finish

**WHITE EDGE PIECE**  
CB05-021-EDGE  
300 x 50 x 145mm

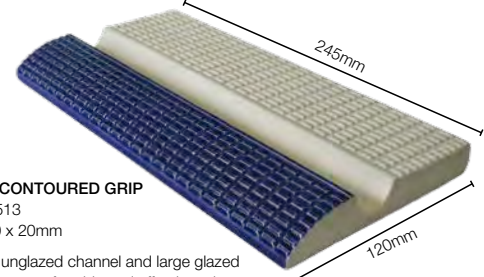

Barefoot Wet (TRRL55 Wet) = 50

Also in Beige CB05-023-EDGE

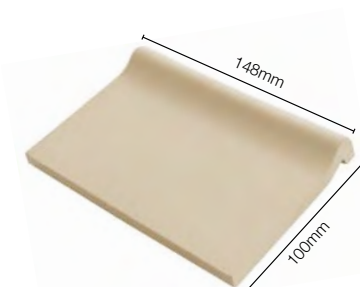

**COBALT FLAT GRIP**  
CS1187-2512  
245 x 120 x 6mm

Partially glazed and rounded at the edge. Ideal for step or pool edging. See page 71 for coordinating products

**COBALT CONTOURED GRIP**  
CS817-2513  
245 x 120 x 20mm

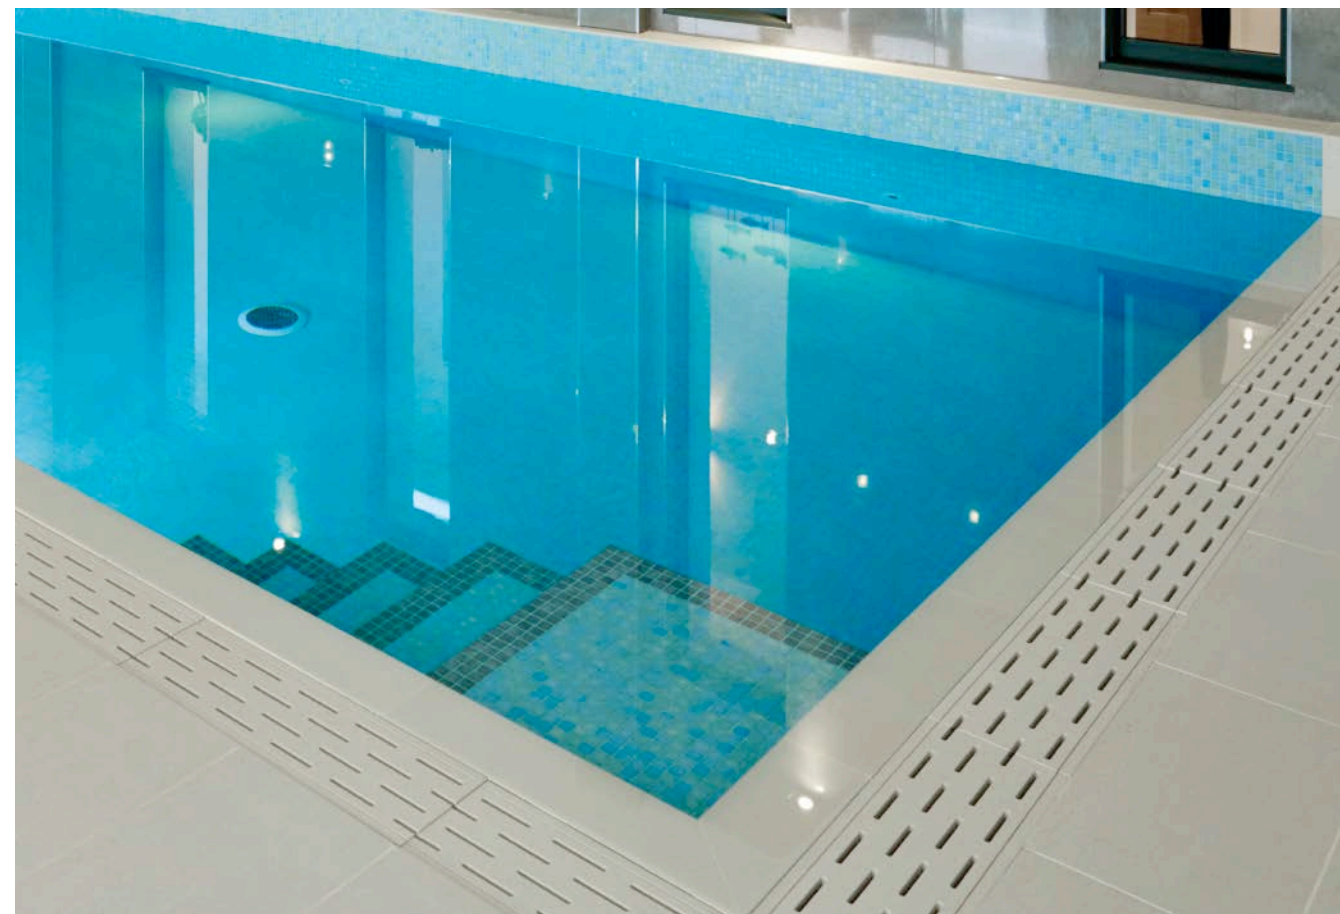

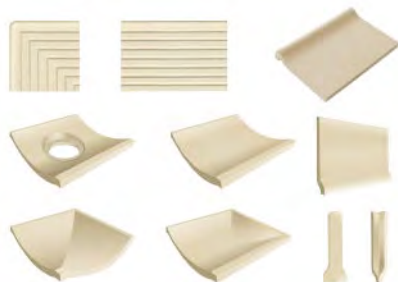

The deep unglazed channel and large glazed edge ensure comfortable and effective grip. See page 73 for coordinating products

**DORSET POOL GRIP**  
148 x 100 x 12mm (nominal)  
Barefoot Wet (TRRL55 Wet) = >40

Also available in Black DW-PGBLK1510

See page 72 for the complete range of Dorset channels and fittings

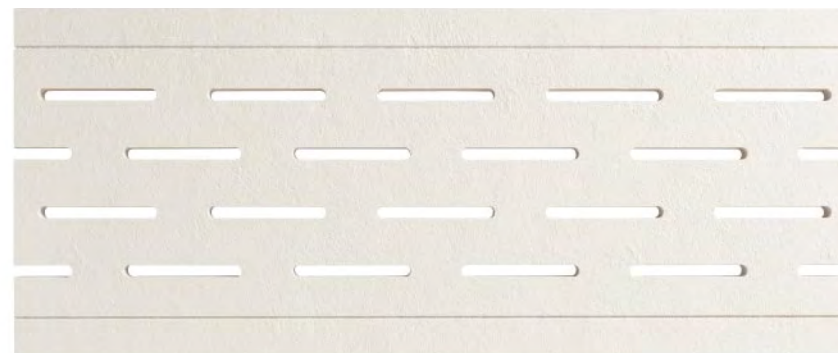

Drainage channels cut to order

## go with the flow

Have you ever felt that your beautiful dream pool and its surroundings has been let down a little by rather unsightly channel drainage grills or covers?

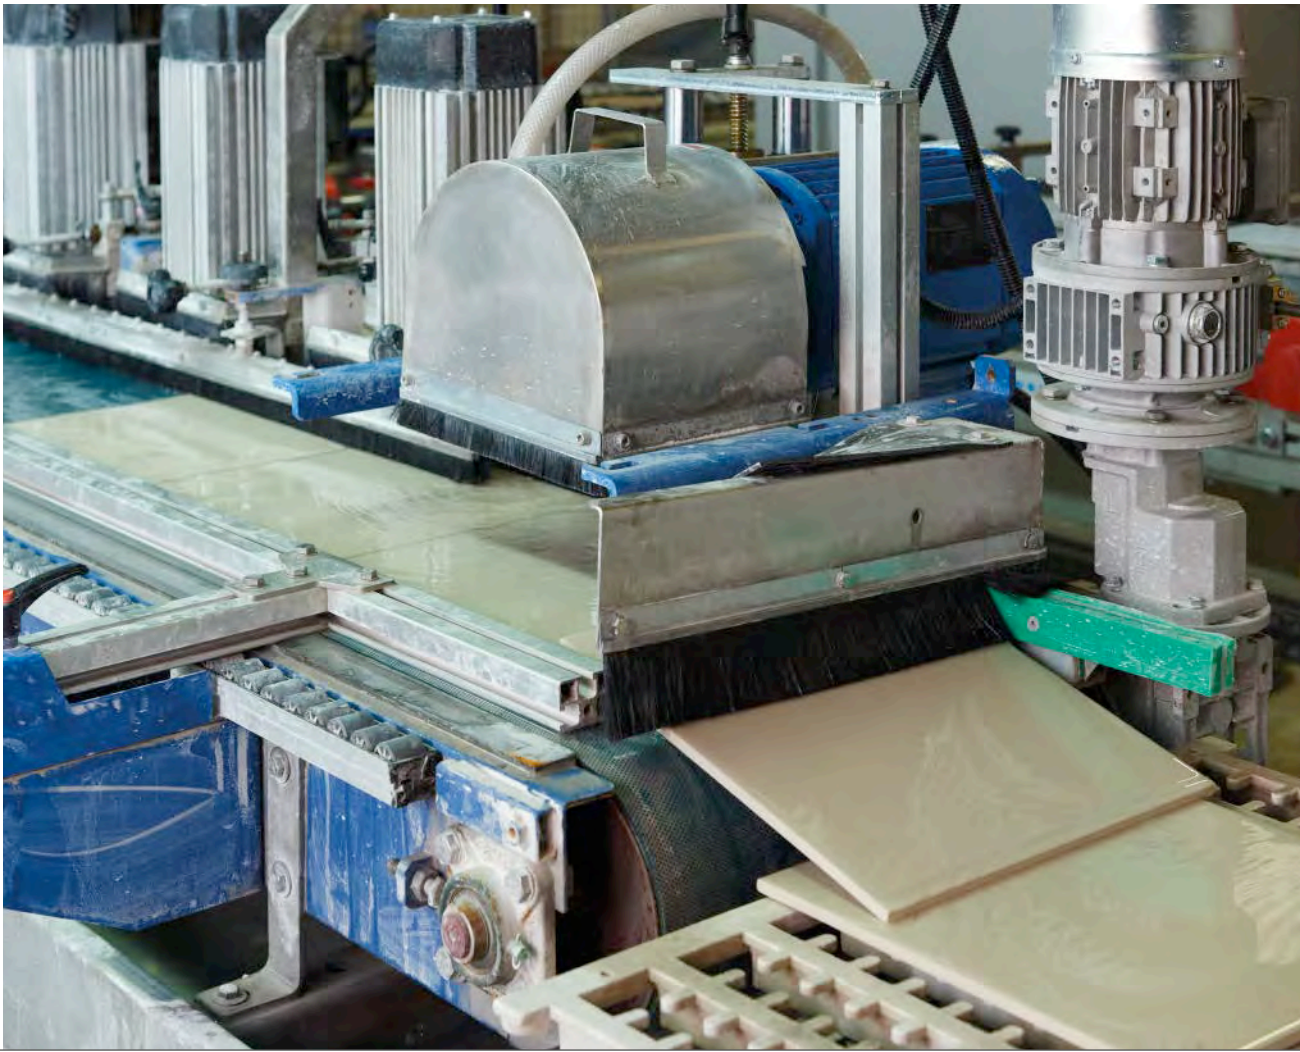

Recently the only option has been metal, plastic or composite: all very useful materials that do the job, just not very pretty. Here's the perfect solution. A drainage grill made from the same material and shade as your surrounding tiles, ie hard wearing porcelain tiling with slip resistant properties. So as well as providing your choice of pool surround tile we can engineer more of the same tiles to fit the channels, providing a near seamless finish.

An example of an engineered grill made from Roma Sand

NB: Please note, these bespoke pieces are subject to suitability and compatibility with the chosen flooring products.

300 x 300mm tiles being bullnosed

## home ground to perfection

Skirting, bullnosing and gradino profiles can all be shaped in-house, offering you a fully integrated look

There's no need to compromise on finishing pieces such as bullnose edging, gradino profiles and skirtings, as you can choose these at the same time and from the same tiles as your pool surrounds. We engineer these pieces at our in-house facilities from our extensive stock to your specific installation requirements.

## tried & tested

Safety is paramount around water.

You need to be confident that materials used for your project meet the Health and Safety Executive's guidelines for slip resistance.

All of our surround tiles are tested in-house.

Pendulum Testing

# safety first

All tiling products used for flooring need to meet specific criteria. Our products have passed the test

There is a duty of care upon all flooring designers, manufacturers, distributors, installers, contractors and on the architects who specify flooring to ensure that flooring surfaces are fit for purpose and meet the Health and Safety Executive's guidelines for slip resistance

Our products are tested for slip resistance and other properties using a range of methods and the results are included next to each product in the pages of this brochure. The pendulum test is carried out on our premises by our technical advisor, to determine the barefoot wet co-efficient of friction using a TRRL55 rubber slider (see equipment above).

Turn to page 100 for Important Information.

# been inspired?

If you haven't seen the pool of your dreams yet, it can still be yours. Our Bespoke Design Service is on hand to listen to your ideas and help them become real

# have it your way

We will provide you with a bespoke design service to guide you through the huge choice of tiles for your pool and spa, and visualise the finished project by using 3D image plans

Original concept

We can help you with everything from a simple motif design cut exactly to your requirements, to the possibility of transferring a precious or special image or logo onto a large mosaic panel. The possibilities are endless...

The list of our satisfied clients includes celebrities and famous sports people, leisure centres and hotel spas, as well as individuals looking for a pool design to be a unique reflection of their personality.

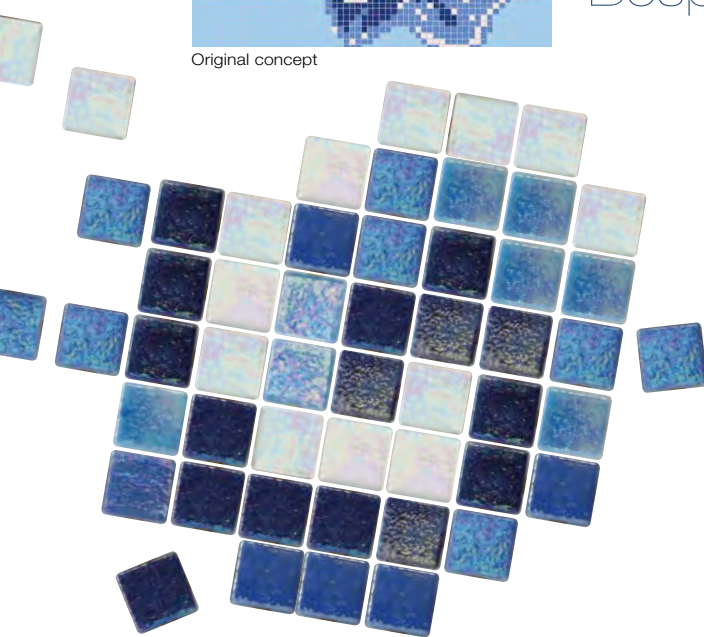

## Bespoke Patterns

CGI concept rendering of the pool area

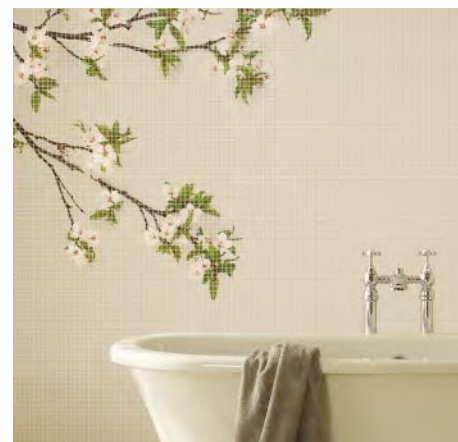

Final result - design created entirely in mosaics

Perla, Azur, Ocean & Zafiro from the Niebla Collection

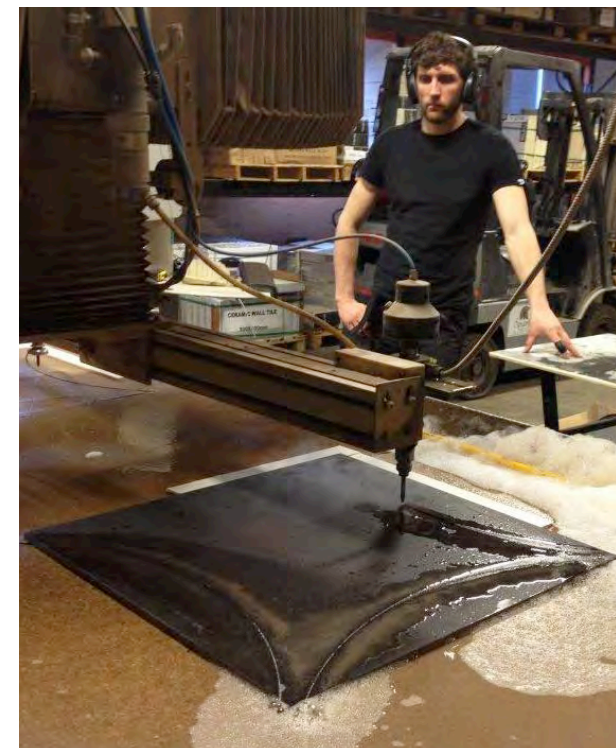

## Digital Imaging

Using the latest print technology, high resolution images can be transferred directly to 25mm mosaics.

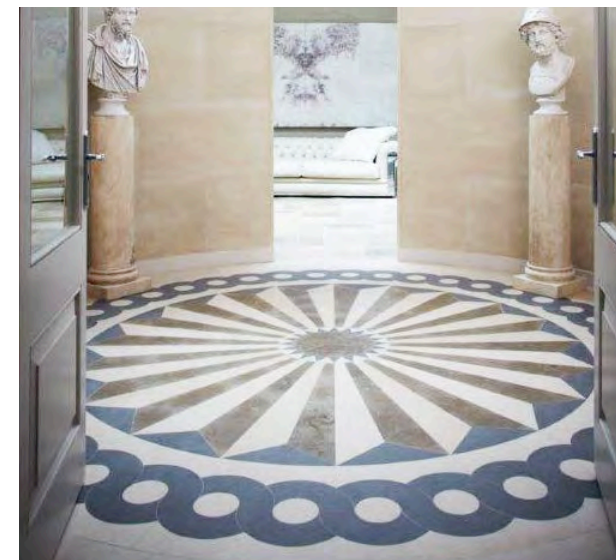

# join the jet-set

## Bespoke waterjet cutting facility

When you need tiles cut precisely and accurately, for example to create complex designs, intricate patterns and curves, we can provide a quick turnaround waterjet cutting service. State of the art technology and skilled operators ensure an accurate and speedy delivery. We can help you with the creative process or carry out your instructions.

The waterjet can be used for surface etching as well as cutting and shaping tiles. Call us to discuss your particular requirements.

## Dare to dream

The pages in this brochure are just a taste of what is on offer. If you would like more information or would like to talk to us about what we can do for you please call us on +44 (0)1392 473037 to discuss your specific requirements.

# important information

**Sample Service**  
Samples of mosaics can be sent on request. Full size mosaic sheet samples are usually chargeable at a reduced rate.

**Dimensions**  
Nominal sizes and thicknesses are shown throughout the brochure. Owing to the high degree of hand finishing of some of the mosaics featured, actual dimensions for individual mosaic sheets may vary from these figures. All dimensions are subject to a tolerance of ± 2.5mm. When calculating the number of mosaic sheets you will require, please do not forget to make 5% allowance for cutting and wastage.

**Colour Variations**  
There may be distinctive yet subtle variations in shade in many of the mosaics and tiles included in this brochure. A single sample tile should not be taken as a completely accurate indication of colour.

**Use of Mosaics in Swimming Pools**  
We recommend JointPoint® backed mosaics (offering 92% contact with the adhesive) and pool suitable paper/film faced mosaics (offering 100% contact with the adhesive) for swimming pool installations. It is however, a preference of some pool installers to use mesh backed mosaics. Providing the mesh backed mosaics are correctly installed, the correct grouts and adhesives are used and the pH balance in the pool is correct (see below) the chances of the adhesion failing are minimised. If they are installed incorrectly or the wrong adhesive and grouts are used, the mesh backed mosaics can fail, due to the pH imbalance of the chemicals in the water attacking the grout and then subsequently the adhesion. Original Style cannot be held responsible if mesh backed mosaics are used in a swimming pool and the adhesion subsequently fails.  
Some of the glass mosaics suitable for swimming pools included in this brochure are available as paper faced, on an extended lead-time. Please discuss this option when placing your order.

**Adhesives and Grouts**  
The water in your pool must have a pH balance of between 7.2 and 8 to eliminate acid and high alkali attacking the grout, which can cause the tiles to debond. Please be aware that all grouts have different water absorption properties. We recommend that your grout should be between 0.05% and 0.1% water absorption. Some grouts can have up to 7% water absorption, which is likely to affect the adhesion and cause the tiles to debond.

**Caution**  
Coloured grouts may be used on our mosaics, however, they may alter the overall appearance of the mosaic colour. If they are used, we strongly recommend that a small area is tested before installation. Please be aware that certain grouts are not UV resistant and will fade when placed in direct sunlight. Please contact the grout manufacturer for further advice. When installing mosaics alongside thicker tiles that are not in pools, e.g. as a border, we recommend a packing material such as P.C.I. Pacidur boards.

**Pools and Power Showers**  
If using our tiles within in a pool that has water movement e.g flumes and slides, or if using in a shower area which has a power shower, it is important to use adhesive and grout products specified for the purpose. For further advice please contact the adhesive manufacturer.

**NB** Original Style makes no representations as to the fitness for purpose of third party adhesives and grouts.

**Maintenance and Cleaning**  
Please note, the use of certain acid based cleaning products may cause some mosaics to react and change in character. Do not use hydrofluoric acid pool cleaners as these will have an adverse effect on the mosaics. We recommend the use of pH neutral cleaning products on our tiles unless stated otherwise. Regular cleaning of mosaics is recommended as a build up of certain deposits (such as magnesium and calcium) can be detrimental, even causing acid etching on the surface. These are difficult or, in some cases, impossible to remove if left.

**Scratching**  
As with all glass products, glass mosaics can be scratched. Care should be taken in installation and that glass mosaics are not put in high-risk areas for scratching. It is important to use a fine grade or non-sanded grout to avoid scratching the surface of glass mosaics. Glass mosaics should not be used on counter tops because of the likelihood of scratching.

**Use of Glass Mosaics Near Heat**  
Original Style recommends mosaics are installed a minimum of 3cm from any direct heat source. As glass is a very good conductor of heat caution must be taken when considering installation in areas of extreme heat.

**Storage**  
It is important to keep all Original Style tiles and also any fixing materials such as grouts and adhesives in a cool and dry area before installation.

**Photography**  
Owing to variations in studio lighting and printing inks, the tile colours shown in this catalogue may differ slightly from those of the actual tiles. Before making your choice it is always advisable to ask for samples.

## Product Specific Information

**Mixed Blend and Gold Fleck Mosaics**  
Some of the mixed blends and gold fleck mosaic sheets contain transparent pieces. We advise that the mesh backing behind any transparent pieces should be carefully removed before fixing so the mesh is not visible after installation. Always use a suitable white glass adhesive with these mosaics. Solid bed method of installation is recommended.

**Gold Fleck and Iridescent Mosaics**  
The surfaces of some of the gold fleck and iridescent mosaics are very slightly pitted, which is one of their inherent features. Unless they are sealed first, any pitted surface may become unavoidably filled during the grouting process, resulting in a speckled appearance. We recommend that these tiles are sealed with a removable protective sealer prior to installation.

Some mosaics are inherently pitted and some have slight edge chipping, this is a natural aspect of certain mosaics. Please check that the mosaics you have chosen to install are to your satisfaction as installation is taken as acceptance.

Please test a small inconspicuous area before installation, following all manufacturers' instructions.

**Plastic Film Faced and Paper Faced Mosaics**  
Film faced mosaics are faced with a plastic film and should be adhered in the same way as other mosaics, but with the film facing outwards. Always use a suitable white rapid setting flexible mosaic adhesive. The adhesive should be left for at least 24 hours to allow it to completely set and dry. If necessary make slight adjustments to straighten the mosaics. Do this before the adhesive has set by carefully cutting the film with a sharp knife. Paper faced mosaics should be adhered in the same way as other mosaics, but with the paper facing outwards. Wet the paper and peel off before the setting material hardens to allow time to straighten the mosaics and to check that the colour and shade are correct on each sheet as you work.

**Pebble Mosaics**  
To avoid visible grout lines, some pebbles may require adjusting slightly so that they interlock with adjoining pebble sheets.

**Splitface Stone**  
Care must be taken to ensure that the substrate is suitable (eg backerboard) due to the substantial weight of these products (48kg per m²).

For more detailed instructions for fixing mosaics and tiles to walls and floors please see refer to the Original Style Fixing Guide at [www.originalstyle.com/en/fixing](http://www.originalstyle.com/en/fixing), and also BS 5385-4:2009 Part 4 Design and Installation of Ceramic and Mosaic Tiling in Special Conditions Code of Practice. For all pool installations please consult with your pool contractor and refer to the manufacturers of grouts, adhesives and other materials.

**Limits of Liability**  
Original Style accepts no liability for the faulty installation of its tiles. In the case of any claim relating to the tiles themselves, Original Style's liability, to the extent permitted by law, is limited to either the replacement of the product or a refund of the cost of the product, and does not extend to cover any consequential loss. Tiles must be inspected prior to installation and claims cannot be considered after the tiles have been installed. Claims must be reported within seven working days from receipt of the tiles. Tile sizes may vary slightly from the stated nominal dimensions within internationally accepted standards. Please be advised that installation constitutes acceptance of the quality, colour, texture, size and shade of the tiles. Please note the use of certain acid-based cleaning products may cause some of the tiles to react and change in character. Original Style warrants that its tiles conform to their description and are fit for their purpose. Original Style makes no representations as to the fitness for purpose of third party adhesives and grouts.  
Original Style makes no other express or implied warranty as to fitness or suitability of the products for particular installations. We extend no guarantees, express or implied, as to wear resistance or maintenance procedures.

## Slip Resistance testing methods

Pendulum Barefoot Wet (BS7976-2 TRRL 55)

This is a swinging arm test apparatus to determine the wet coefficient of friction using a rubber slider that simulates a bare foot in wet conditions.

Accepted limits for flooring using this technique are as follows:

Slip Potential	Range
High	19 and below
Moderate	20 to 39
Low	40 to 74
Very Low	75 and above

Ramp Barefoot Wet (DIN 51097)

The tiles are fixed on a ramp which is then wetted. A person with bare feet walks on the wetted surface as the ramp angle is increased until the person slips. The angle at which slipping occurs is recorded. There are three categories A B and C. A has the highest slip potential and C the lowest.

The following is a classification with wet area usage recommendations:

Cat.	Angle	Area of use
A	12° - 17°	Individual and group changing rooms with lockers Pool floor in the non-swimmer areas where water level exceeds 80cm
B	18° - 23°	Showers Area surrounding the disinfectant sprayers Pool floor in the non-swimmer areas where the water level is less than 80cm in parts Pool floor in the non-swimmer areas in the tide effect pool Steps leading into the water Steps of maximum 1m width with hand rails leading into the water Steps outside the pool area
C	>23°	Pool surrounds Paddling pools Steps leading into the water if not classified in B
